EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kanzaki on June 21, 2006.

The application has been amended as follows:

Claim 1, delete lines 5-16, and has been replaced -- linking a plurality of elements of said displayed program code to a data file, said data file comprising implementation instructions for said plurality of elements of the computer program; including instructions that include program code comments; directing for a variable in the program code in a register, and calling a function as in-line code, wherein at least one of the elements of the program code is linked to comments, and at least one of the elements of the program code is linked to the first directive, and at least one of the elements is linked to the second directive; and

displaying a corresponding implementation instruction for said queried element in said user interface and in response to a query of one of said at least one linked element of the computer program.--

Claim 10, delete lines 7-14, and has been replaced –a data file comprising a plurality of implementation instructions linked to a plurality of elements of the computer program code; including instructions that include program code comments; directing for

a variable in the program code in a register, and calling a function as in-line code, wherein at least one of the elements of the program code is linked to comments, and at least one of the elements of the program code is linked to the first directive, and at least one of the elements is linked to the second directive;--

Claim 17, delete lines 5-12, and has been replaced –an associated a data file comprising a plurality of implementation instructions linked to a plurality of elements of the computer program code; including instructions that include program code comments; directing for a variable in the program code in a register, and calling a function as in-line code, wherein at least one of the elements of the program code is linked to comments, and at least one of the elements of the program code is linked to the first directive, and at least one of the elements is linked to the second directive; and-

Claim 22, delete lines 6-17, and has been replaced –linking a plurality of elements of said displayed program code to a data file, said data file comprising implementation instructions for said plurality of elements of the computer program, including instructions that include program code comments; directing for a variable in the program code in a register, and calling a function as in-line code, wherein at least one of the elements of the program code is linked to comments, and at least one of the elements of the program code is linked to the first directive, and at least one of the elements is linked to the second directive; and

displaying a corresponding implementation instruction for said queried element in said user interface and in response to a query of one of said at least one linked element of the computer program.--

Claim 33, delete lines 7-13, and has been replaced --including instructions that include program code comments; directing for a variable in the program code in a register, and calling a function as in-line code, wherein at least one of the elements of the program code is linked to comments, and at least one of the elements of the program code is linked to the first directive, and at least one of the elements is linked to the second directive;--

Allowable Subject Matter

2. Claims 1-7, 9-28, 33-35, 37-41 are allowed.

The following is an examiner's statement of reasons for allowance:

The allowablility of the independent claims resides, at least in part, in that closest prior art of record Bailey (U. S. Patent 6,701,513) does not disclose or suggest, alone or in combination, inking a plurality of elements of said displayed program code to a data file, said data file comprising implementation instructions for said plurality of elements of the computer program, including instructions that include program code comments; directing for a variable in the program code in a register, and calling a function as in-line code, wherein at least one of the elements of the program code is linked to comments, and at least one of the elements of the program code is linked to

the first directive, and at least one of the elements is linked to the second directive; and, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed Kidest Bahta whose telephone number is 571-272-3737. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo Picard can be reached on 571-272-3749. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application information Retrieval IPAIRI system. Status information for published applications may be obtained from either Private PMR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAG system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-fee).
